Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-17, and 55-58 drawn to compounds and compositions, classified in class 546, and a variety of subclasses.
- II. Claims 18-26, drawn to a method of treating diabetes, classified in class 514, and a variety of subclasses.
- III. Claims 27-35, drawn to treating inflammation classified in class 514, and multiple subclasses.
- IV. Claims 36-44, drawn to a method of treating immunological diseases, classified in class 514, and multiple subclasses.
- V. Claims 45-54, and 59-60 drawn to a mutiple methods of treating diseases, classified in class 514, and multiple subclasses.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I is related to II, III, IV and V as product and a process of use.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the

instant case, the product as claimed can be used in a materially different process of using that product.

3. Inventions II, III, IV and V are unrelated to each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions have different functions (i.e. treating different ailments).

4. Claims 1-63 are generic to a plurality of disclosed patentably distinct species comprising those disclosed in the examples of the specification. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Claims 45-54 and 59-60 are generic to a plurality of disclosed patentably distinct methods of treatment comprising those disclosed in the each claim. Applicant is required under 35 U.S.C. 121 to elect a single disclosed method. Note that the ailments being treated are not recognized as obvious over one

another. Should applicant desired to have all the different methods claims examined together, a statement on the record that they are obvious would suffice.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
